

The CompTIA Partner program has provided us with greater exposure and set us apart as a recognized training provider. It's enabled us to offer industry recognized cybersecurity training and certification to the public and members at a discounted rate, resulting in empowerment of underrepresented groups. We were also grateful for a Security+ training and certification scholarship partnership in 2021 which has resulted in several women obtaining their Security+ certifications and reaching new career heights with new jobs, increased salaries, and job promotions.
