

Large Enterprise Media & Entertainment Company

A TechValidate Research Report

This is a short format research report describing how users address business or technology challenges with their Ocarina ECOsystem. All information contained in this report was sourced directly from users with first-hand experience deploying their Ocarina ECOsystem. TechValidate verifies the identity of all users involved in its research studies and guarantees anonymity so that they can speak candidly.

Ocarina ECOsystem Deployment Details and Benefits

From our surveys of Ocarina users, we have collected the following statistics, testimonials, and verified facts about their usage and deployment of their Ocarina ECOsystem.

TechFact

Testimonial: Ocarina Impacts New Disk Purchases, Productivity

The Ocarina ECOsystem has enabled me to build a cost effective nearline disk archive to store data that is critical to the success of our organization. This solution has drastically reduced the net price of new disk purchases and increased overall end user productivity.

Testimonials about Using Ocarina ECOsystem

The following testimonials have been collected and validated by TechValidate from real world users who have experience deploying and using their Ocarina ECOsystem.

TechFact

Testimonial: Ocarina Enables Usage Efficiencies

"We're able to create a persistent archive of assets that can be reused easily, saving artist time and effort. We can extract value from the stuff we used to "discard" (from the artists perspective)."
