

Case Study: Neighborhood Credit Union

Challenges

- Purchased SolarWinds LEM to address the following challenges:
 - Report that they are meeting their compliance requirements to auditors
 - Meet compliance requirement, for example, by storing log data for a required retention period
 - Determine whether a security incident has occurred and what happened
 - Collect and store log data from all devices in a single place
 - Protect endpoints by monitoring events, and file and registry changes
 - Correlate logs and events from network devices, servers, and applications

Use Case

- Collects log and event data from between 0 and 100 nodes.
- Collect logs and events from the following devices:
 - Servers
 - Switches
 - Routers
 - Firewalls
- Collect log and events from the following applications:
 - Infrastructure applications; e.g., DHCP, DNS, Active Directory, etc.
 - E-mail servers
 - Web servers and applications
 - Antivirus software
 - Databases

Results

- Realized the following benefits with SolarWinds LEM:
 - Easily provide the reports and data they need to prove they are meeting their compliance requirements
 - Troubleshoot application and network problems
 - Aggregate their log data in a single place
- Purchased SolarWinds over competitive vendors for the following reasons:
 - SolarWinds' features
 - Being an existing SolarWinds customer or purchasing with other SolarWinds' products
 - SolarWinds' reputation
