

## SmartPipe Solutions Ltd.: A10 Beats F5 in Head-to-Head Comparison and Delivers Strategic Value

4.5/5 Stars

Please describe why you selected solutions from A10 Networks (advanced features, lower TCO, etc.) and the value that you have gotten from them (application performance, better security, etc.).

While evaluating competitors A10 and F5, it came down to price, accessibility and application support. A very specific application-level network interface module was required by us, and A10 Thunder had the protocols and scripting support that had that. New ADC product features were delivered to complete our solution, also adding **strategic value** to the product.

Would you recommend A10 Networks Thunder Series, and if so, why?

**A10 provides a high-performance, intelligent network interface solution to create a standardized interface to the rest of our application.** As part of the engagement, A10 provided new AFlex ICAP integration support, significantly increased vThunder capacity, and a new traffic load-balancing algorithm specifically required by our application.
