Mikronet Bilgisayar Ltd. of Turkey Applauds A10's SSLi Solution Within Its Infrastructure

★★★★★

5/5 Stars

Please describe why you selected solutions from A10 Networks and the value your organization has achieved from them.

> " We needed a scalable solution that could expand horizontally with our traffic. With A10's layer 3 Thunder SSLi decryption solution, *we have managed to overcome more than 100% expansion of traffic throughout our data centers*. The only thing that we needed to do was purchase the same device and add an additional 20 GB traffic capacity cluster.

Please describe the most significant benefit(s) to your network operations that you achieved with your A10 Networks' solutions.

> "
> - Thunder SSLi easily enables/disables security layer when incidents happen
> - Horizontal expansion when more capacity needed
> - Ease of commissioning with new devices
> - Integration to current security operations infrastructure
