

# A Large Healthcare System Finds it Significantly Easier to Identify Special Patient Risks with PDC Healthcare's Alert Wristbands

## Introduction

This case study of a non-profit is based on a May 2017 survey of PDC Healthcare color-coded alert products customers by TechValidate, a 3rd-party research service. The profiled organization asked to have their name blinded to protect their confidentiality.

“PDC Healthcare’s alert wristbands alert all individuals working with patients outside the patient nursing unit setting.”

## Challenges

The business challenges that led the profiled organization to evaluate and ultimately select PDC Healthcare color-coded alert products:

- Experienced the following challenge prior to using color-coded alerts at their hospital:
  - Difficulty in identifying special patient risk or status
- Found it somewhat difficult to identify patients with special risks before using PDC Healthcare’s color-coded alert products.

## Use Case

The key features and functionalities of PDC Healthcare color-coded alert products that the surveyed organization uses:

- Is currently using the following color-coded alert product at their hospital:
  - Alert wristbands
- Uses the following color-coded alerts at their hospital:
  - Allergy (Red)
  - DNR (Purple)
  - Fall Risk (Yellow)
  - Latex Allergy (Green)

## Results

The surveyed organization achieved the following results with PDC Healthcare color-coded alert products:

- Has experienced the following benefit since using the PDC Healthcare color coded alerts:
  - Identify special patient risks
- Found it significantly easier to identify special patient risks since using color-coded alert products from PDC Healthcare.

### Organization Profile

The organization featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Industry:  
**Non-profit**

### About PDC Healthcare Color-Coded Alert Products
