# Determinism (fixed latency) is viewed as a critical aspect of latency reduction.

Prioritised importance of network device functions.

Legend: ■ Critically Important - 1 ■ 2 ■ 3 ■ 4 ■ Minimal Importance - 5

- Latency reduction
- Deterministic performance
- Implement SDN strategy
- FPGA implementation
- Implement 25G, 40G, 100G
- Data capture
- Improve network monitoring
- Devops integration/rollout
