

Chief Information Security Officer reduces down-time with Bitdefender's remediation, quarantine management, and clean up

Introduction

This case study of a medium enterprise energy & utilities company is based on a March 2017 survey of Bitdefender GravityZone Security for Endpoints customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

“With Bitdefender, we gain a single integrated and modular agent with layers of protection to predict, prevent, detect, and automatically remediate threats.”

Challenges

- Evaluated Bitdefender GravityZone Security for Endpoints for the following reasons:
 - Achieve better protection against ransomware attacks
 - Enhance security against advanced threats missed by traditional, signature-based AV
 - Minimize productivity drain due to remediation efforts or re-imaging machines
 - Secure heterogeneous IT environment across virtualized servers and physical endpoints
 - Eliminate performance concerns of their current endpoint security product
- Evaluated the following endpoint security solutions before choosing Bitdefender:
 - Kaspersky Labs
 - Trend Micro
- Removed the following endpoint security solutions from their environment after migrating to Bitdefender:
 - Kaspersky Labs

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size:
Medium Enterprise

Industry:
Energy & Utilities

Use Case

- Chose Bitdefender GravityZone Security for Endpoints for the following reasons:
 - Integrated, modular, and light-weight endpoint agent
 - Resource optimization for both physical and virtual machines
- Protecting the following endpoints with Bitdefender:
 - Windows-based desktops and laptops
 - Virtual desktop infrastructure (VDI)

About Bitdefender GravityZone Security for Endpoints

Bitdefender GravityZone is a security solution for cloud and virtualized environments, offering organizations dramatically faster and more efficient risk management.
