

How our organization uses BlueJeans Network:

BlueJeans has been very helpful in complying with the C19 meeting and gathering rules. We have had very limited issues with video quality and the audio has been great – this is the most important issue for our live-streamed public meetings.

Would you recommend BlueJeans Network?

I would definitely recommend BlueJeans! My experience with some other providers is that they grew too big, too fast and their growing pains are apparent in the quality of service.
