

5/5 Stars

How our organization uses BlueJeans Network:

I contacted several webinar companies to ask for a demo, so I could convert my in-person training to online/video. BlueJeans was first to get back to me. In my conversation with the rep, the rep suggested I didn't need the pricier webinar solution, but could do a better job with my 15 person interactive hands-on training using BlueJeans Meetings. THIS WAS EXCELLENT SERVICE, and was a major decision factor for me.

Would you recommend BlueJeans Network?

I would recommend using BlueJeans. An important factor was Linux desktop support (I run Fedora). BlueJeans has great Linux support.
