

We had the Cisco SX-10 system installed and never used it in 8 months. Our Cisco vendor installed it and walked away with no training or support. BlueJeans is super easy and very intuitive to use. Support and training were fantastic. We have pushed our vendors and business partners to use BlueJeans to meet with us and they all love it as well. We rolled out a new 401k Plan with it, Connect with the Federation Members across the country with it, and will save \$28,000 doing benefit meetings with BlueJeans for our 265 employees in 3 states.
