

How our organization uses BlueJeans by Verizon:

We pivoted online in March 2020 to deliver all our services and required a highly secure, easy-to-use service as we were working with under 18s outside of supervised classroom environments. BlueJeans provided us everything we needed and has improved its own features over the last year+, more than we expected.

Would you recommend BlueJeans by Verizon?

We'd recommend BlueJeans as it is a flexible, high quality video conferencing solution with fantastic options for learning and innovation environments.
