Calabrio Provides Flexibility, Ease of Use, and Great Tech Support

How our organization uses Calabrio ONE:

" Within our organization, we have nearly 30 different business units each with their own unique requirements. For some we use Calabrio for compliance (Archive) recording only, while others leverage the Quality side only recording some calls to be graded, and others use both.

Would you recommend Calabrio ONE?

" I would, Calabrio works. It has many options; with little training it's easy to use and the tech support is great.
