

CAE Technology Services

Introduction

This case study of CAE Technology Services is based on a May 2018 survey of Cisco Email Security customers by TechValidate, a 3rd-party research service.

“Deploying Advanced Malware Protection (AMP) with Cisco Email Security has helped my organization protect against stealthy malware and remediate it faster.”

“Decreased spam by 100%”

Challenges

The business challenges that led the profiled company to evaluate and ultimately select Cisco Email Security:

- Chose Cisco Email Security to protect their Office 365 email because Cisco has:
 - Stronger protection from advanced email threats (business email compromise (BEC), advanced malware and/or phishing)
 - Better spam efficacy
 - Global presence and more comprehensive threat intelligence
 - More robust data loss prevention and encryption capabilities
- Protects sensitive information in outgoing emails with:
 - Microsoft Office 365 built-in tools
- Evaluated the following vendors prior to choosing Cisco Email Security:
 - Symantec
 - Barracuda

Use Case

The key features and functionalities of Cisco Email Security that the surveyed company uses:

- Bought Advanced Malware Protection (AMP) and Cisco Email Security at the same time.
- Using the following Cisco products in addition to Cisco Email Security:
 - AMP for Endpoints or AMP on another product
 - AnyConnect
 - Identity Services Engine (ISE)
 - Next Generation Firewall (NGFW)
 - Umbrella
 - Web Security Appliance (WSA)

Results

The surveyed company achieved the following results with Cisco Email Security:

- Achieved the following with Cisco Email Security:
 - Protected users from threats in incoming email to prevent breaches
 - Contained the impact of threats due to faster detection
 - Prevented data loss of sensitive content in outgoing email
 - Encrypted sensitive data in outgoing email to achieve compliance with regulations
