Introduction

This case study of a non-profit is based on a May 2018 survey of Cisco Email Security customers by TechValidate, a 3rd-party research service. The profiled organization asked to have their name blinded to protect their confidentiality.

“Cisco Email Security is cost-effective and easy to use.”

“The solution meets all of my needs, it is effective at blocking spam and marketing e-mails, malicious attachments, and suspicious/malicious links in messages. The interface is easy to use both as a user and an administrator. I LOVE the fact that the appliance is hosted in the cloud by Cisco, so I don’t need to worry about hardware maintenance.”

Challenges

The business challenges that led the profiled organization to evaluate and ultimately select Cisco Email Security:

- Protects sensitive information in outgoing emails with:
 - Cisco data loss prevention (DLP) for email
 - Citrix Sharefile Encrypted Messaging
- Evaluated the following vendors prior to choosing Cisco Email Security:
 - Proofpoint
 - Symantec
 - Fusemail

Use Case

The key features and functionalities of Cisco Email Security that the surveyed organization uses:

- Uses the following Cisco products in addition to Cisco Email Security:
 - AnyConnect
 - Next Generation Firewall (NGFW)
 - Next-Generation Intrusion Prevention System
 - Umbrella

Results

The surveyed organization achieved the following results with Cisco Email Security:

- Achieved the following with Cisco Email Security:
 - Protecting users from threats in incoming email to prevent breaches

Organization Profile

The organization featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Industry:
Non-profit
