

CISCO EMAIL SECURITY CASE STUDY

S&P 500 Energy & Utilities Company

Introduction

This case study of an S&P 500 energy & utilities company is based on a February 2018 survey of Cisco Email Security customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

"Cisco Email Security offers faster management and makes it easier to respond to questions and search logs. We were also able to customize the experience for users to utilize the junk email folder."

"Content filters are extremely configurable. The solution has multiple options for most settings that enabled us to customize our user experience."

Challenges

The business challenges that led the profiled company to evaluate and ultimately select Cisco Email Security:

- To protect against advanced threats (ransomware, business email compromise (BEC) or phishing)
- To improve spam efficacy

Purchased Cisco Email Security over the following competitive solutions:

- Symantec
- Barracuda

Use Case

The key features and functionalities of Cisco Email Security that the surveyed company uses:

- Currently deploying Cisco Email Security on-premise.
- Other Cisco security products used in addition to Cisco Email Security:
 - Advanced Malware Protection (AMP)
 - Web Security Appliance (WSA)
 - Next Generation Firewall (NGFW)
 - Next-Generation Intrusion Prevention System
 - AnyConnect

Results

The surveyed company achieved the following results with Cisco Email Security:

- Is satisfied with their purchase of Cisco Email Security.
- Cisco Email Security enables the organization to:
 - Prevent security breaches
 - Detect threats faster
 - Remediate advanced malware

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size: **S&P 500**
