

CISCO EMAIL SECURITY CASE STUDY

## Technology Concepts & Design

#### Introduction

This case study of Technology Concepts & Design is based on a February 2018 survey of Cisco Email Security customers by TechValidate, a 3rd-party research service.

"Cisco Email Security has literally taken email security off our management plate and allowed us to focus on other areas. It catches everything! It's peace of mind knowing that we made the perfect decision for email security!"

"Its accuracy in catching bad emails! With limited tuning, it just works. The other products we evaluated had to be tweaked constantly and just missed a lot of spam."

### Challenges

The business challenges that led the profiled company to evaluate and ultimately select Cisco Email Security:

- To protect against advanced threats (ransomware, business email compromise (BEC) or phishing)
- To prevent data loss and encrypt sensitive content for compliance reasons
- To integrate with other Cisco security products

Purchased Cisco Email Security over the following competitive solutions:

- Symantec
- Trend Micro

#### **Use Case**

The key features and functionalities of Cisco Email Security that the surveyed company uses:

- Currently deploying Cisco Email Security on-premise
- Other Cisco security product used in addition to Cisco Email Security:
  - Advanced Malware Protection (AMP)

## Results

The surveyed company achieved the following results with Cisco Email Security:

- Is extremely satisfied with their purchase of Cisco Email Security.
- Cisco Email Security enables the organization to:
  - Prevent security breaches
  - Remediate advanced malware
  - Prevent data loss/leaks
  - Secure sensitive information in transit with encryption
