CISCO EMAIL SECURITY CASE STUDY

Quatrro Global Services

Introduction

This case study of Quatrro Global Services is based on a June 2018 survey of Cisco Email Security customers by TechValidate, a 3rd-party research service.

> " "Cisco Email Security is a good tool to protect against spam. Several transport rules can be created and it has excellent technical support."

Challenges

The business challenges that led the profiled company to evaluate and ultimately select Cisco Email Security:

- Chose Cisco Email Security to protect their Office 365 email because Cisco has:
    - Stronger protection from advanced email threats (business email compromise (BEC), advanced malware and/or phishing)
- Protects sensitive information in outgoing emails with:
    - By creating several policies
- Evaluated the following vendors prior to choosing Cisco Email Security:
    - Proofpoint
    - Trend Micro

Use Case

The key features and functionalities of Cisco Email Security that the surveyed company uses:

- Did not buy Advanced Malware Protection (AMP) at the same time as Cisco Email Security.

Results

The surveyed company achieved the following results with Cisco Email Security:

- Achieved the following with Cisco Email Security:
    - Protected users from threats in incoming email to prevent breaches
    - Contained the impact of threats due to faster detection
    - Encrypted sensitive data in outgoing email to achieve compliance with regulations
- Reduced their time to detection of threats by more than a month after using Cisco Email Security.
