

Camper

Introduction

This case study of Camper is based on a February 2018 survey of Cisco Email Security customers by TechValidate, a 3rd-party research service.

“Cisco Email Security is a strong solution that helped us decrease spam.”

“Easy management.”

Challenges

The business challenges that led the profiled company to evaluate and ultimately select Cisco Email Security:

- To protect against advanced threats (ransomware, business email compromise (BEC) or phishing)
- To improve spam efficacy
- To integrate with other Cisco security products
- Purchased Cisco Email Security over the following competitive solution:
 - Barracuda

Use Case

The key feature and functionality of Cisco Email Security that the surveyed company uses:

- Currently deploying Cisco Email Security on-premise.
- Other Cisco security products used in addition to Cisco Email Security:
 - Web Security Appliance (WSA)
 - Identity Services Engine (ISE)
 - AnyConnect

Results

The surveyed company achieved the following results with Cisco Email Security:

- Is extremely satisfied with their purchase of Cisco Email Security.
- Cisco Email Security enables the organization to:
 - Prevent security breaches
 - Detect threats faster
 - Remediate advanced malware
 - Secure sensitive information in transit with encryption
