

Small Business Insurance Company

Introduction

This case study of a small business insurance company is based on a June 2018 survey of Cisco Email Security customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

“Cisco Email Security allows us to get insight and control spam/malicious email. It also allows us to better track all email.”

Challenges

- Evaluated the following vendors prior to choosing Cisco Email Security:
 - None. Our 3rd party vendor offered no alternatives.

Use Case

The key features and functionalities of Cisco Email Security that the surveyed company uses:

- Purchased Advanced Malware Protection (AMP) after purchasing Cisco Email Security.
- Using the following Cisco products in addition to Cisco Email Security:
 - Identity Services Engine (ISE)

Results

The surveyed company achieved the following results with Cisco Email Security:

- Achieved the following with Cisco Email Security:
 - Protected users from threats in incoming email to prevent breaches
 - Act as a Spam and Graymail filter

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size:
Small Business

Industry:
Insurance
