Milind Samant, a Chief Security Officer at The College at Old Westbury State University of New York, would be very likely to recommend Cisco Email Security for this reason:

" The project – adding Cisco Email Security to protect Office 365 inboxes – was a big success. Working with the Cisco team was a very pleasant experience, and they were very generous with their knowledge. The deployment process was a breeze and took less than 10 minutes. Support has been very good. The licensing model works for higher education institutes.
