

University Of California, Santa Cruz

Introduction

This case study of University of California, Santa Cruz is based on a December 2017 survey of Cisco Identity Services Engine (ISE) customers by TechValidate, a 3rd-party research service.

“ISE supports our other ‘non-cisco’ devices, but its ease of integration has influenced our current buying, as ISE has become an integral part of our security enforcement.”

Challenges

The business challenges that led the profiled organization to evaluate and ultimately select Cisco Identity Services Engine (ISE):

- Driven to purchase Cisco ISE based on the following trends:
 - Secure Network Access
 - Cybersecurity
 - IoT
 - Mobility
 - Remote Access

Use Case

The key features and functionalities of Cisco Identity Services Engine (ISE) that the surveyed organization uses:

- Deployed the following ISE services:
 - User and Endpoint Visibility
 - Access Control
 - Guest Services
 - Device Administration

Results

The surveyed organization achieved the following results with Cisco Identity Services Engine (ISE):

- Achieved the following outcomes from using Cisco ISE:
 - Provided actionable intelligence on the users and devices on the network
 - Complied with regulatory requirements
 - Minimized the impact of a breach
- Reports the following networking environments gaining the most value from Cisco ISE:
 - Switching
 - Wireless
 - Security
 - Non-Cisco Network Access Devices
