

CISCO AMP FOR ENDPOINTS CASE STUDY

Inflow Technologies Pvt. Ltd.

Introduction

This case study of Inflow Technologies PVT LTD is based on a January 2020 survey of Cisco AMP for Endpoints customers by TechValidate, a 3rd-party research service.

"AMP for Endpoints provides comprehensive protection against the most advanced attacks. It Prevents breaches and blocks malware at the point of entry, then rapidly detects, contains, and remediates advanced threats that evade frontline defenses and get inside your network."

Challenges

The business challenges that led the profiled company to evaluate and ultimately select Cisco AMP for Endpoints:

- Invested in Cisco AMP for Endpoints because they:
 - Needed to protect against advanced threats
 - Needed to improve security operations efficiency
 - Wanted to increase threat detection and remediation speed and accuracy
 - Needed to be able to respond to incidents faster
 - Needed tools to enhance their threat hunting capabilities
- Considered the following vendors before selecting Cisco AMP for Endpoints:
 - McAfee

Use Case

The key features and functionalities of Cisco AMP for Endpoints that the surveyed company uses:

- Other Cisco Security products used in addition to Cisco AMP for Endpoints:
 - Threat Response
 - Umbrella
 - Email Security
 - Threat GridStealthwatch
 - NGFW (Next-Generation Firewall)
 - DUO (Multi-Factor Authentication/MFA)AnyConnect
 - AnyConnect
 - ISE (Identity Services Engine)
 Rates Cisco AMP for Endpoints on the following features:
- Antivirus feature: blocking known malware: extremely satisfied
 - Exploit prevention feature: protecting against file-less malware: extremely satisfied
 - and device trajectory): extremely satisfiedThreat intelligence: ability to understand unknown threats to their

Threat detection and response feature: continuous file monitoring (file

environment: extremely satisfiedMulti-platform/OS support: extremely satisfied

Results

Endpoints:Most prominent benefits realized from their investment in Cisco AMP for

The surveyed company achieved the following results with Cisco AMP for

- Endpoints:Realized better overall protection/prevention against file-less malware,
 - ransomware, and other advanced threats

 Improved security operations efficiency
 - Experienced faster and more accurate threat detection and remediation
 - Experienced faster, more effective incident response
 - Enhanced threat hunting capabilities
 Experienced the following after implementing Cisco AMP for Endpoints:

Reduced security risks: greater than 75%

- Improved security operations efficiency: greater than 75%
 Improved threat detection and remediation speed and quality: greater
 - than 75%

 Improved incident response speed and effectiveness: greater than
 - 75%Reduced costs and increased staff productivity by simplifying
 - complex endpoint security management tasks: greater than 75%

 Cisco AMP for Endpoints helped their security team to better protect their
 - environment from:
 - Ransomware

Zero-day threats

- Cryptomining
- File-less malwareDrive-by-attacks
- Their confidence in protecting their endpoints against malware and other
- threats has very significantly improved now that they have Cisco AMP for Endpoints as part of their security strategy.

 Reduced their time to detection of threats by more than a month after
- implementing Cisco AMP for Endpoints.
