Global 500 Energy & Utilities Company

Introduction

This case study of a Global 500 energy & utilities company is based on a March 2018 survey of Stealthwatch customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

> " "Cisco Stealthwatch is very easy to setup and configure, and it does what we want. It has reduced the time to detect and remediate threats within our organization from months to hours. One of the features we have found to be most useful is the additional user context and ability to quarantine infected hosts that is available through the integration with Cisco Identity Services Engine (ISE)."

Challenges

The business challenges that led the profiled company to evaluate and ultimately select Stealthwatch:

- Faced the following challenges before their network visibility and security analytics solution:
  - Lack of visibility into a complex network with branches, IoT devices, remote employees and guests, cloud infrastructure

Use Case

The key features and functionalities of Stealthwatch that the surveyed company uses:

- Uses Stealthwatch to gain visibility into:
  - Data centers
  - Access
  - Edge
  - Core

Results

The surveyed company achieved the following results with Stealthwatch:

- Uses Stealthwatch to help with:
  - Investigating the source of the threat through network audit trails

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size:
Global 500

Industry:
Energy & Utilities
