# What benefits have you experienced by using Cisco Secure Network Analytics in conjunction with Cisco SecureX?

Stealthwatch now comes with SecureX, Cisco's cloud-native security platform, built-in and it also includes SecureX threat response (formerly Cisco Threat Response or CTR).

Benefit	Percentage
Automated detection and response using pre-built workflows or playbooks	21%
Improved confidence in alarms by correlating global intelligence and local context, across all the integrated security solutions	24%
Accelerated threat investigations and incident management using one view	32%
We haven't activated SecureX yet but plan to	59%
