

CRISIS PREVENTION INSTITUTE CASE STUDY

Brevillier Village (Ohio) and Dementia Capable Care Training

Introduction

This case study of Brevillier Village is based on a September 2016 survey of Crisis Prevention Institute customers by TechValidate, a 3rd-party research service.

"Following the DCS Foundation Course, our staff are better at looking for what the residents can do versus what they can no longer do. I see them engaging residents in person-centered, stage-appropriate tasks, which lead to successful, meaningful interactions."

"DCS has improved staff skills in promoting positive behavioral responses with clients."

Challenges

- Sought DCS training and consulting to:
 - Increase client function, safety, and quality of life
 - Improve staff, resident, and family relationships
 - Improve staff skills and confidence in handling challenging behaviors
 - Reduce psychotropic medication use
 - Decrease staff turnover and stress

Environment

- Describes their memory care environment as:
 - Assisted living
 - Skilled nursing/long-term care
 - Short-term rehab/transitional care
 - Dementia care unit
 - Hospice care

Results

- Improved their dementia care practices by 25–49%.
- Using DCS training resulted in:
 - Improved provisioning of person-centered care
 - Decreased decline in ADL performance
 - Improved resident engagement in meaningful activities
- Achieved return on their investment with DCS by:
 - Increasing clients' function, safety, and quality of life
 - Improving staff, resident, and family relationships
 - Improving staff skills and confidence in managing challenging behaviors
 - Maximizing reimbursements (appropriate therapy service referrals and utilization)
