

CRISIS PREVENTION INSTITUTE CASE STUDY

Caney Creek Rehabilitation Complex - Kentucky

Introduction

This case study of Caney Creek Rehabilitation Complex is based on a June 2016 survey of Crisis Prevention Institute customers by TechValidate, a 3rd-party research service.

"This is a wonderful program that focuses on safety and verbal de-escalation as the primary intervention, with physical restraints as a last resort."

"CPI improved staff de-escalation skills, improved overall safety, and has become ingrained in our training."

"CPI has promoted effective communication for both clients and staff."

Challenges

Sought Nonviolent Crisis Intervention® training to improve staff skills in managing behaviors.

Environment

Categorizes their mental health environment as community health.

Results

- Reduced challenging/disruptive behaviors by over 50% since implementing CPI de-escalation techniques.
- Decreased the use of physical restraint and seclusion by 75—99% since implementing CPI training.
- Agrees that the enhanced content has helped them, their staff, and their organization.
- Achieved return on investment with CPI by:
 - Reducing injuries
 - Reducing worker compensation claims
 - Reducing staff turnover
 - Reducing liability
 - Improving staff skills and confidence
