

4.5/5 Stars

Please describe how your organization uses Crisis Prevention Institute.

CPI is the basis for patient intervention that all of our employees are taught when they come in to the hospital their first week of orientation. This coincides with organizational policy so the entire staff is able to coordinate for de-escalation and restraints when these things become necessary.

Would you recommend Crisis Prevention Institute, and if so, why?

I would recommend CPI because the techniques that are taught are broadly applicable and able to be utilized by all staff. I would also recommend it because there is an emphasis on verbal de-escalation and an understanding that physical interventions are only to be utilized as a last resort.
