

## Medium Enterprise Health Care Company (Mississippi) and Dementia Capable Care Training

The training is excellent and the follow-up support has been fabulous as well. The training we can provide our staff through DCS raises our standards in the care we provide. DCS has shown the staff ways to engage with our residents based on their cognitive levels. The staff were always asking what they could do with the residents and now that they understand their cognitive levels, activities are more meaningful and bring out their best abilities to learn.
