

EnSafe Inc.

Introduction

This case study of EnSafe Inc. is based on an October 2022 survey of CrowdStrike customers by TechValidate, a 3rd-party research service.

“Let’s just put it this way, CrowdStrike is the core of our cyber security strategy. From asset management to IDP, we count on CrowdStrike and the Falcon Complete team to keep our environment safe.”

“Within days of deploying NextGen AV/EDR, we got to see CrowdStrike and the Falcon team in action. Response to malware detection was swift and effective. When we brought in IDP, it was a real eye-opener. So many threats/vulnerabilities we had not even considered. Months later now after deploying IDP, I feel much safer about where we are today.”

Challenges

Which of the following represented the biggest security challenge(s) for your organization before implementing CrowdStrike?

- Complying with numerous privacy, security and regulatory requirements
- Facing increasingly advanced cyber threats (i.e. ransomware, identity-based attacks)
- Limited or insufficient amount of security professionals on staff to monitor 24x7

Why did you choose CrowdStrike over other solutions?

- For the simple, single-agent unified platform
- For the deployment flexibility (i.e., offered as a cloud-native service, a customer-managed, on-premises implementation, etc.)
- Because they are a proven security leader recognized by major analysts and best-in-class protection by independent testing
- Because it allows for automation of security controls via integrations with existing or other security tools
- For the human expertise and services
- For the world-class technology and intelligence
- Because it was recommended by a trusted advisor and/or peers at another company

What other vendors did you consider before choosing CrowdStrike?

- SentinelOne
- Microsoft

Use Case

What features of CrowdStrike are you using?

- Next Gen. Antivirus (Falcon Prevent)
- Endpoint Detection & Response (Falcon Insight)
- Threat Intelligence (Falcon Intelligence)
- Device Control
- Threat Hunting (Falcon Overwatch)
- IT Hygiene (Falcon Discover)
- Identity Protection
- Managed Services/Detection & Response (Falcon Complete)

Results

CrowdStrike security solutions compared to the competition:

- Performance: Best In Class
- Ease of use: Best In Class
- Reliability: Best In Class
- Scalability: Best In Class
- Breach Prevention: Best In Class

What benefits did your organization realize following the deployment of CrowdStrike?

- Improved the efficiency of our security operations
- Improved application quality
- They were able to find and shut down threats they had no prior knowledge of
- Delivered faster IT and security performance
- Improved data protection of critical information
- A greater ability to meet regulatory compliance standards

In your best estimate, by what percent did CrowdStrike improve the following?

- Reduce IT/Security Costs: 100% +
- Reduce IT/Security Maintenance: 100% +
- Reduce time spent tracking down and resolving security threats: 100% +

Engineering

About CrowdStrike

CrowdStrike (Nasdaq: CRWD), a global cybersecurity leader, has redefined modern security with the world’s most advanced cloud-native platform for protecting critical areas of enterprise risk — endpoints and cloud workloads, identity and data. Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities. Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value. CrowdStrike: We stop breaches.
