

DataCore SDS – Cost Effective Freedom from Vendor Lock-in

The main benefit of Datacore’s Solution is the free choice of storage types to use. You’re not tied down by a massive and expensive dual and replicating System from the same vendor. You can choose different Vendors and storage types to gain your needed Performance and data availability/security. With a moderate setting of “use really only NEEDED features” you will be able to receive a high-quality solution with Performance for all your needs.
