

5/5 Stars

How our organization uses Progress DataDirect:

We have embedded DataDirect into our SaaS Development Platform to enable access to a large number of data sources without coding.

In addition, we use it to integrate with any kind of REST API. It is also used to allow integrating on-premise data sources from the Cloud.

Would you recommend Progress DataDirect?

Yes, we would recommend DataDirect, especially because of its performance, scalability, and support for embedding into our solutions.
