

Visibility into Patients' Medication Adherence Enables LifePoint Hospitals to Intervene and Reduce Readmissions with MedHx

Introduction

This case study of LifePoint Hospitals, Inc. is based on a December 2021 survey of DrFirst customers by TechValidate, a third-party research service.

Challenges

The business challenges that led LifePoint Hospitals to evaluate and ultimately select MedHx:

- Incomplete medication history data

The primary sources of readmissions:

- Medication non-adherence
- Difficulty following home care and/or complications from home care

Use Case

Most effective methods or tools when helping patients adhere to their treatment plans:

- MedHx Companion
- EHR functionality
- Interviews with patients and family members

Results

LifePoint Hospitals achieved the following results with DrFirst:

- Feels their patient records are 75% complete

LifePoint Hospitals agreed with the following statement, *“MedHx Companion has improved our ability to monitor medication adherence with our patients and intervene when necessary.”*
