

Post-covid assistance with Mortgage Assistance Applications and very tough conversations. Examples include a couple in their 80's who were facing foreclosure because they could no longer afford their home but could not face moving. After their GreenPath conversation they told their only child the truth about their finances, she helped them get their home ready to sell. She renovated her home to move them in and they have financial freedom again from their sale profit. Another homeowner suffered a stroke 2 years after buying her 1st home. GreenPath counselors provided her information on affordable apartments in an area she wanted to live in and we were able to negotiate a D-I-L and assist her with her deposit and moving expenses.
