

“Quality.

I am a test lead. [We adopted] TestRail as our test management tool [and it] provides transparency for the work completed by QA team. QA team takes greater responsibility and [are now] accountable to the test cases assigned to them and produce many quality system releases going onward.

In addition, I am able to use TestRail to generate test progress reports and update projects teams about our test progress.

— Hwi Mei Lim, Test Lead, Third Party Platform
