

Gusto is a fantastic resource. We're a lean small business, so I really wanted a modular HR solution that we could plug into our administrative architecture and have it handle all our HR tasks. After using Gusto for a month, we're now fully compliant (in three states), I'm able to process payroll (and sync it with Quickbooks) in about a minute, and I don't worry about running afoul of any labor laws I'm unfamiliar with. I know Gusto will alert me when I've crossed another threshold and when I need to check off another "must have."
