

5/5 Stars

I love Gusto so much more than the other provider I was using. The other provider I used made mistakes that they refused to fix and were costly to me. Even with the proof I sent, they refused to fix the issue. When Gusto made a mistake one time, I contacted them to provide proof but it wasn't even necessary because Gusto was already on it and fixing it, and by the time I contacted them they had already been working on it. That and the fact that they're completely automated, my CPA can access everything, and it's easy to use – that is why I love Gusto.
