4.5/5 Stars

How our organization uses Ranorex:

❝ We use Ranorex for our end-to-end and regression tests, and it helped us a lot in automating the test cases in a short period of time. We have currently a code coverage of 65% and we would love it increase it in the coming sprint.

Why would you recommend Ranorex?

❝ We would recommend Ranorex, because it's quite easy to use and sometimes there is no need for coding. Plus the object recognition feature is one of the best in the market.
