

5/5 Stars

How our organization uses Ranorex Studio:

**“** We have used Ranorex to automated our Manual Regression testing, Patch testing, and document upload testing. What normally takes 35 hours of manual regression testing, we have decreased this time by 96% to 1 hour and 19 minutes.

Would you recommend Ranorex Studio?

**“** Ranorex Studio is so simple a beginner can use the software with no code involved and powerful enough for expert developers to build tests as well.
