

5/5 Stars

How our organization uses Ranorex Studio:

Automation of mobile apps. Test cases are created in Ranorex Studio and integrated with HP QC to run them on physical mobile devices on dedicated test machines with a USB connection.

Would you recommend Ranorex Studio?

Easy and intuitive to use. Quickly create test cases. Ranorex Spy is invaluable in debugging test cases that fail and allows us to quickly recover. No other tool on the market is comparable. Also, the support team is very helpful in debugging any major issues.
