

## Why did you choose Ranorex Studio?

I need a reliable tool to test my Winforms/WPF hybrid application. I do the whole software on my own and have very high requirements when it comes to quality. Ranorex Studio is the only testing tool out there that helps me to get tests done in minutes and extend my automatic regression suite in a way I wouldn't be able to do with any other tool. In short: the great recorder and how tests are done in Ranorex Studio (UX and UI)
