

4.5/5 Stars

Please describe how your organization benefited from the IPC training and certification.

Our staff have benefited by having a standardized work method and knowing those in this industry are all working from the same page, this has helped throughout with many difficult decisions regarding an individuals interpretations!! like a integrated IC heel-toe-fillet acceptance criteria,

Would you recommend IPC training and certification, and if so, why?

Among many other issues we have found a very high level of fulfilment among our staff at achieving there pass certification exams certificate, so all in all we are extremely pleased we joined this path as we continue to grow as a team.
