

Detasad

Introduction

This case study of DETASAD is based on an October 2019 survey of Kenna Security customers by TechValidate, a 3rd-party research service.

“We have selected Kenna to manage vulnerabilities and so far it works as expected.”

Challenges

The business challenges that led the profiled company to evaluate and ultimately select Kenna Security:

- Vulnerability management challenges they experienced that led them to implement the Kenna Security Platform:
 - Too many vulnerabilities with no way to effectively prioritize
 - High volume of security data lacking context for decision making
 - No way to quantify or measure risk from vulnerabilities
 - Inefficiencies in vulnerability remediation

Use Case

The key features and functionalities of Kenna Security that the surveyed company uses:

- Approaches used to prioritize vulnerabilities prior to Kenna:
 - CVSS 7+
 - CVSS 8+
 - CVSS 9+
 - CVSS 10
- How they evaluate the success of their Kenna Security platform implementation:
 - Reduction in Mean Time To Remediate (MTTR)
 - Kenna risk score reduction
 - SLA Adherence
- Kenna’s primary advantage(s) over other vulnerability management platforms:
 - Kenna has been integrated with our Secureworks SIEM making our incident response more efficient.

Results

The surveyed company achieved the following results with Kenna Security:

- Reduction of time spent on the following activities, since using Kenna:
 - Time spent on Vulnerability Investigation: over 50%
 - Time spent on remediation: over 75%
 - Time spent on reporting: over 75%
- Kenna Security Platform compared to other vulnerability management solutions:

Company Profile

Company:
DETASAD

Company Size:
Medium Enterprise

Industry:
Computer Services

About Kenna.VM

Cisco Vulnerability Management (formerly Kenna.VM) offers an effective, efficient way to reduce your risk profile using risk-based prioritization powered by data science. Rely on it to ID the vulnerabilities that put you at the greatest risk, create a self-service environment for remediation teams, set intelligent SLAs based on your risk tolerance, compare your risk posture against industry peers, deliver clear reports with intuitive metrics, and more.
