

Large Enterprise Automotive & Transport Company

Introduction

This case study of a large enterprise automotive & transport company is based on an October 2019 survey of Kenna Security customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

“Simply put, our internal customers are now more willingly involved.”

Challenges

- Vulnerability management challenges they experienced that led them to implement the Kenna Security Platform:
 - Too many vulnerabilities with no way to effectively prioritize
 - High volume of security data lacking context for decision making
 - No way to quantify or measure risk from vulnerabilities
 - Inefficiencies in vulnerability remediation

Use Case

- Approach used to prioritize vulnerabilities prior to Kenna:
 - Use rating system from scanner
- How they evaluate the success of their Kenna Security platform implementation:
 - Reduction in Mean Time To Remediate (MTTR)
 - Reduction in IT remediation time
 - SLA Adherence
- Kenna’s primary advantage(s) over other vulnerability management platforms:
 - Kenna goes beyond basic risk scoring and tells them what they need to fix first
 - Kenna provides awareness of how much risk is in their environment

Results

The surveyed company achieved the following results with Kenna Security:

- Reduction of time spent on the following activities, since using Kenna:
 - Time spent on Vulnerability Investigation: over 10%
 - Time spent on remediation: over 50%
 - Time spent on reporting: over 75%
- Kenna Security Platform compared to other vulnerability management solutions:
 - Remediation Intelligence (guidance on “what to fix first”): Superior
 - Integrated real-time global exploit intelligence: Superior
 - Data science-based risk scoring methodology: Superior
 - “Off the shelf” integrations with a wide range of security data sources: Superior
 - Predictive vulnerability modeling: Superior

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size:
Large Enterprise

Industry:
Automotive & Transport

About Kenna.VM

Cisco Vulnerability Management (formerly Kenna.VM) offers an effective, efficient way to reduce your risk profile using risk-based prioritization powered by data science. Rely on it to ID the vulnerabilities that put you at the greatest risk, create a self-service environment for remediation teams, set intelligent SLAs based on your risk tolerance, compare your risk posture against industry peers, deliver clear reports with intuitive metrics, and more.
