KENNA SECURITY CASE STUDY

Genpact Ltd

Introduction

This case study of Genpact Ltd is based on an October 2019 survey of Kenna Security customers by TechValidate, a 3rd-party research service.

> "Kenna provides more comprehensive insight for organizational vulnerability status and provides a chance to prioritize and remediate within stipulated time. "

Challenges

The business challenges that led the profiled company to evaluate and ultimately select Kenna Security:

- Vulnerability management challenges they experienced that led them to implement the Kenna Security Platform:
    - Too many vulnerabilities with no way to effectively prioritize
    - No way to quantify or measure risk from vulnerabilities
    - Inefficiencies in vulnerability remediation

Use Case

The key features and functionalities of Kenna Security that the surveyed company uses:

- Approaches used to prioritize vulnerabilities prior to Kenna:
    - CVSS 7+
    - CVSS 8+
- How they evaluate the success of their Kenna Security platform implementation:
    - Kenna risk score reduction
    - Reduction in IT remediation time
    - SLA Adherence
- Kenna's primary advantage(s) over other vulnerability management platforms:
    - Kenna goes beyond basic risk scoring and tells them what they need to fix first
    - Kenna provides meaningful and actionable data for remediation (remediation intelligence)
    - Kenna provides awareness of how much risk is in their environment
    - Kenna is updated continuously with real-time information

Results

The surveyed company achieved the following results with Kenna Security:

- Reduction of time spent on the following activities, since using Kenna:
    - time spent on Vulnerability Investigation: over 50%
    - time spent on remediation: over 50%
    - time spent on reporting: over 50%

Company Profile

Company:
Genpact Ltd
