

Deloitte & Touche

Introduction

This case study of Deloitte & Touche is based on a September 2020 survey of Kenna.VM customers by TechValidate, a 3rd-party research service.

“With Kenna .VM, we are now able to prioritize vulnerabilities on the basis of the risk score.”

Challenges

The business challenges that led the profiled company to evaluate and ultimately select Kenna.VM:

- The vulnerability management challenges they were experiencing that led them to implement the Kenna.VM:
 - High volume of security data lacking context for decision making

Use Case

The key features and functionalities of Kenna.VM that the surveyed company uses:

- The approach they used to prioritize vulnerabilities prior to Kenna:
 - A rating system from scanner
- They best describe their current engagement model between the Security and IT team as Security investigates and prioritizes vulnerabilities; IT remediates.
- The criteria they use to evaluate the success of your Kenna.VM implementation:
 - Kenna risk score reduction
 - Reduction in reporting time

Results

The surveyed company achieved the following results with Kenna.VM:

- Before Kenna vs. After Kenna: Have you seen a reduction in time spent on the following activities? (Security and IT team time combined)
 - Time spent on Vulnerability Investigation: 10 – 25%
 - Time spent on remediation: 50 – 75%
 - Time spent on reporting: 10 – 25%
- Kenna’s primary advantage(s) over other vulnerability management platforms:
 - Kenna goes beyond basic risk scoring and tells me what I need to fix first
 - Kenna is updated continuously with real-time information
 - Kenna aggregates data and reporting from multiple tools (vuln scanners, CMDB, discovery)
- Rates the following for Kenna.VM compared to other vulnerability management solutions:
 - Remediation Intelligence (guidance on “what to fix first”): superior
 - Integrated real-time global exploit intelligence: on par
 - Data science-based risk scoring methodology: superior
 - “Off the shelf” integrations with a wide range of security data sources: highly superior

Company Profile

Company:
Deloitte & Touche

Company Size:
Large Enterprise

Industry:
Financial Services

About Cisco Vulnerability Management

Cisco Vulnerability Management (formerly Kenna.VM) offers an effective, efficient way to reduce your risk profile using risk-based prioritization powered by data science. Rely on it to ID the vulnerabilities that put you at the greatest risk, create a self-service environment for remediation teams, set intelligent SLAs based on your risk tolerance, compare your risk posture against industry peers, deliver clear reports with intuitive metrics, and more.
