

# Large Enterprise Energy & Utilities Company

## Introduction

This case study of a large enterprise energy & utilities company is based on an October 2019 survey of Kenna Security customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

## Challenges

The business challenges that led the profiled company to evaluate and ultimately select Kenna Security:

- Vulnerability management challenges they experienced that led them to implement the Kenna Security Platform:
  - High volume of security data lacking context for decision making
  - No way to quantify or measure risk from vulnerabilities

## Use Case

- Approach used to prioritize vulnerabilities prior to Kenna:
  - Use rating system from scanner
- How they evaluate the success of their Kenna Security platform implementation:
  - Kenna risk score reduction
  - Reduction in IT remediation time
- Kenna's primary advantage(s) over other vulnerability management platforms:
  - Kenna goes beyond basic risk scoring and tells them what they need to fix first
  - Kenna provides meaningful and actionable data for remediation (remediation intelligence)
  - Kenna is updated continuously with real-time information
  - Kenna aggregates data and reporting from multiple tools (vuln scanners, CMDB, discovery)
  - Kenna includes multiple threat intel feeds (eliminating the need for subscription)
  - Kenna's cloud platform scales elastically to virtually any organization size

## Results

The surveyed company achieved the following results with Kenna Security:

- Reduction of time spent on the following activities, since using Kenna:
  - Time spent on Vulnerability Investigation: over 10%
  - Time spent on remediation: over 10%
  - Time spent on reporting: over 25%

### Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size:  
**Large Enterprise**

Industry:  
**Energy & Utilities**

### About Kenna.VM

Cisco Vulnerability Management (formerly Kenna.VM) offers an effective, efficient way to reduce your risk profile using risk-based prioritization powered by data science. Rely on it to ID the vulnerabilities that put you at the greatest risk, create a self-service environment for remediation teams, set intelligent SLAs based on your risk tolerance, compare your risk posture against industry peers, deliver clear reports with intuitive metrics, and more.
