

Alan Condrat, a LIMS Developer at FLSmidth & Co. A/S, would be very likely to recommend LabWare LIMS and ELN for this reason:

I like the approach taken by LabWare.

LabWare assumes that every installation will want to modify the system to its needs.

LabWare offers a base system with tools designed to configure the base system. The tools are very good. Being a developer, this appeals to me.

Also, LabWare has the best technical support I have ever seen.
