

4/5 Stars

How our organization uses LabWare:

LabWare LIMS/ELN is so integrated into my organization that I can't measure the damage it would cause if removed for any reason. We have a huge environment running v6 on 5 virtual concurrent servers and over 400 users (internal employees, suppliers, partners all over the world). It encompasses the entire product development, formulae development, tests, SAP integrations, product securities issues, regulatory affairs, etc.
