

## Get Accurate Search Results Allowing You to Perform With Confidence by Using Lexis Advance

“ Using Lexis Advance has positively impacted my job performance because I know I am getting an accurate search result because it allows me to plug in as much information I want in order to gather what I need. For example, when searching death records, a person’s first and last name can yield many death records, but when you narrow it down by state and town you get the exact results you need. This is crucial for my part in the process because if someone becomes deceased during the process, we need to proceed in a different way.
